

Paolo **Chillari**
Maison Les Villanelles N°13
3, Av. Gaston de Fontmichel
06130, Grasse - France

Dear Sirs,

With this letter I would like to show that I have the necessary enthusiasm, qualities and training needed to underline the reasons that led me to choose your company among other proposals.

I'm currently enrolled in the Master of Science Degree Programme in Computer Engineering at Politecnico di Torino and I was selected among the most talented students in Politecnico for a scholarship in France : I'm currently studying at Eurecom Institute in Sophia Antipolis (Telecom Paris Tech University), well known for its contribution to IT research.

During these years I have developed strong computer engineering technical skills and enhanced my personal disposition to teamwork. Moreover, what I consider most valuable is my interest and full commitment to the world of the Web and in particular to Javascript. I have dedicated my free time to learn and enhance my knowledge in this field, starting from the fundamentals and deepen in its most advanced features. I taught myself to use the most popular frontside javascript frameworks for single page application, always trying to understand grasp the philosophy behind them. Since they came out I have loved tools like Angularjs, Yeoman, Grunt, Bower, Twitter Bootstrap for their contribution to the javascript and frontend development world.

Since my passion for web technologies started I used and deepened different server side technologies and frameworks, from jsp to PHP and when I discovered javascript server side technology with Nodejs I started to experiment and discover this new world of asynchronous programming for backend applications and I found it exciting, motivating and challenging at the same time. I strongly believe these new tools represent the future of Web application and my expectation is to become an active actor(player) in this change.

I highly value the importance of teamwork and working with such leading experts in the field would be a major accomplishment.

I attach my CV provides more details about my main technical skills.

In the meantime, I would be glad to provide further information, please feel free to contact me.

Sincerely,

Paolo Chillari
